Comprehension:

Read the passage carefully and answer the questions that follow :

Holidays are often a time of culinary indulgence even for people who are usually careful about diets for the rest of the year.

But there is more to holiday eating than avoiding excess calories. What we eat affects the health of the entire body, including the immune system. Since the most of the body's immune system is concentrated in the gut and the trillions of healthy bacteria living there called the microbiome - what we eat has a direct impact on how the immune system functions. "A lot of people don't think about the effects of what they eat on immunity. But the science says it's crucial", says Heather Moday, MD, Founder of the Moday Centre for Functional and Integrative Medicine in Norfolk, Virginia, and Philadelphia. And it's especially important at this time of year, since the winter holidays occur around the time when illnesses like colds, flu and other respiratory illnesses peak.

While an occasional indulgence probably won't cause lasting damage, throwing caution to the wind till New Year's Day is certainly unhealthy and might make you more susceptible to getting sick. "Even just a month of really just blowing it and not caring about nutrition can impact the microbiome", says Kristin Kirkpatrick, a registered dietitian at Cleveland Clinic's department of wellness and preventive medicine.

Comprehension:

Read the following passage and answer the questions.

"The next important notion about the king was that he was the servant of the people. An early Dhärmsūtra writer observes that the king is really a servant, the 16% tax being his wage. Kautilya at one place points out how the king was on the same footing as his soldiers, both receiving their different wages and both being entitled to share the assets of the nation. Narada also regards the taxation as the king's pay for the protection of his people. No one ever makes a payment, says Aparākā, without expecting a return; the taxes therefore are paid only as a return for the protection expected from the king. Since the people pay him the proper wage, the king must serve them as a servant, nay even as a slave. This is of course a hyperbolic statement; the reality is hinted by Śukra when he describes the king both as a master and a servant of the people."
